

The solar compacting litter bin

A unique compacting bin with solar panels for optimal use

1

Up to 6 times
compaction of the litter

2

Large and safe
insert opening

3

Solar panels and
battery pack

Scan the QR-code

for a demonstration of the
compacting bin.

The solar compacting litter bin ensures up to 6 times more volume than a normal litter bin. This is a capacity of 720 litres uncompacted. Dirty hands or searching for a foot pedal is in the past with the open insert of this innovative litter bin. The insert also remains available during the pressing cycle. The solar panel and battery pack ensure that the bin is operational all year round. With the compacting bin you can always easily dispose of litter without touching, through the inviting, large and safe insert opening.
