

Can & Bottle Collector

The sustainable and social solution for collecting deposit refund packaging

Outdoor

Can & Bottle Collector

Deposit refund cans and bottles still often end up in the litter bin. Throwing this money away is a waste, and it encourages people to rummage through the bins looking for the cash that is there for the taking. The Can & Bottle Collector is a sustainable solution that makes donating bottles and cans easy. In addition, its placement on the side of the bin makes collecting the deposit refund packages simple.

Can & Bottle Collector

The sustainable and social solution for collecting deposit refund packaging

The Can & Bottle Collector can hold 4 to 6 deposit cans and bottles, providing a practical solution for deposit refund packages. The simple design of the Can & Bottle Collector not only helps reduce litter, but also supports the less fortunate or charitable causes that can benefit from the deposit.

1

Suitable for deposit refund cans and bottles

Both cans and bottles can be easily collected in the Can & Bottle Collector. The design prevents the wind from blowing them out again.

2

Easy access to deposit refund packages

The collector on the side of the litter bin allows easy access to deposit cans or bottles without having to search through the bin for them.

3

Many placement options

The Can & Bottle Collector can be placed and attached in many ways. It fits onto the Citypole, CityPRESS, Metropole and Capitole or can be placed separately on a pole or wall.

Donate deposit refund packaging

Any passerby who wants to dispose of their deposit refund can or bottle can leave it in the Can & Bottle Collector. These can then be picked up and handed in by people who could use the extra money.

Easy to install

Attaching the Can & Bottle Collector is easy. It uses existing holes in the exterior of the Citypole, CityPRESS and Metropole. In addition, it can be mounted on the frame that holds up the Capitole or on a pole or wall.

Wherever you are

VConsyst B.V. is a producer of products and software made for managing and maintaining public outdoor spaces. Driven by social themes such as circularity and sustainability, we work on better living environments that provide increasingly smarter, more efficient and cleaner solutions. We continuously strive for progress. For people, the environment and society. You are not always aware of it, but VConsyst is always around.

You will find our iconic waste bins, bicycle parking systems, bicycle shelters and street furniture throughout the Netherlands and abroad. We provide you with suitable, innovative total solutions for the design and management of public outdoor spaces.

Solutions that make your living environment easier, more beautiful and safer. And above all: more sustainable. Because VConsyst not only thinks about today and tomorrow, but also about future generations. Wherever you are, now and later.
